ELLE Magazine

When reviewing runway film, ELLE's photo editors play spot the Mason Pearson, as this mixed-bristle mane tamer has made an appearance backstage at almost every show we've covered since 1985. It's a bit pricier than drugstore alternatives, but “you're worth it,” we've promised. “A few swipes make hair look blow-out perfect: shiny and sleek.”

NICOLE KIDMAN'S HAIRSTYLIST

“A natural bristle brush from Mason Pearson. They are quite expensive but they're worth it. I always say that if Mason Pearson went out of business, I'd go out of business.”

They give the hair such a smooth and glossy finish.

Rake Comb

The Rake Comb is ideal for coarse textured hair, frizzy hair and long, tight curly hair. Use in the shower to comb through conditioner, detangle wet hair and reduce split ends. Each tooth is highly polished to eliminate any rough edges and ensure a smooth, gentle glide through the thickest hair.

Coloured Brushes

While most people still look for the traditional black handled brushes, sales of the retro-coloured handles are rising sharply. Customers simply want more choices and choosing a coloured brush in pink, blue and white is a way to personalize your style.

Pure Boar Bristle

For Fine Hair & Thinning Hair

Ideal for fine to normal thickness hair, straight and thinning hair. For longer hair choose a bigger brush.

The pure bristle brushes feature unique tufts of close-set bristles that lock in hair as you brush through. Importantly the pure bristles have a lot more “give” than other brands. That means no more split ends and no more static.

For styling, the Extra is ideal for smoothing and finishing hair for that special event. Mason Pearson brushes promote a lovely, natural sheen from scalp to ends. This is the look models and stylists particularly aim for, which is why Mason Pearson is the brush they choose.
